## Introduction to Educate: For Parents

Educate is the program that we will be using for you to access your students' information. The system will allow you to look at assignments and grades, report cards and attendance for your student(s), as well as looking at their profiles, schedule and course information. You must have access to the Internet to get to Educate.

### Login

You will be provided a username and password by your child's school. You will use this information to log in and access your child's information. Please keep your username and password secure to prevent anyone else from accessing your child's school information.

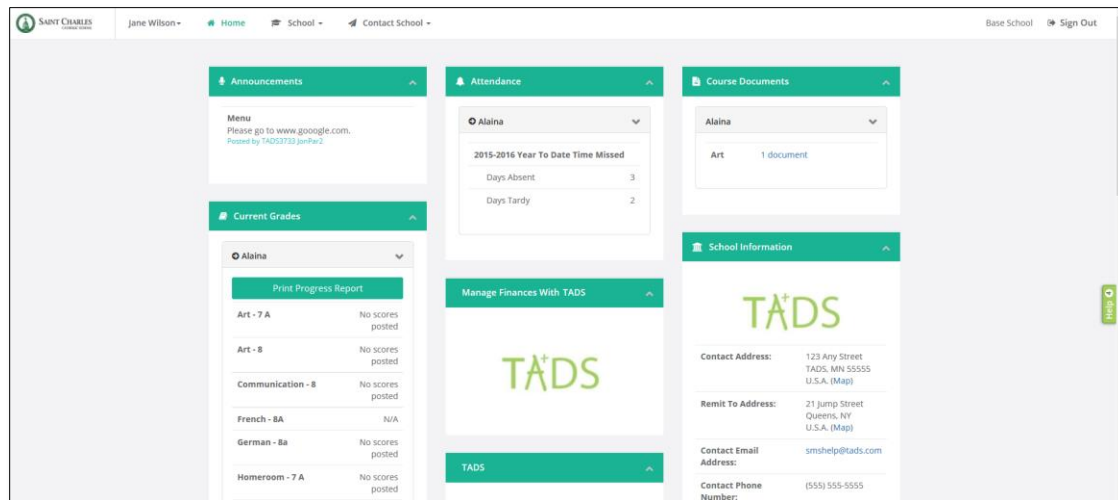

1. Open the Educate website in your Web browser (e.g., Internet Explorer, Firefox, Safari).  
 **HINT:** This URL should be provided by your school.
2. In the *Login to Educate* section, in the *Username* text box, type your username.

3. In the *Password* text box, type your password.  
 **HINT:** Passwords in Educate are case sensitive.
4. Click *Sign In*.  
You are logged into Educate and the *Home* page is displayed.

## The Dashboard

The Dashboard view allows you to customize your home page by adding and moving a variety of sections called “widgets.” Each widget will display a specific type of information, and most will provide you with a snapshot of information about your student(s). In the image below, each section with a blue header is a specific widget.

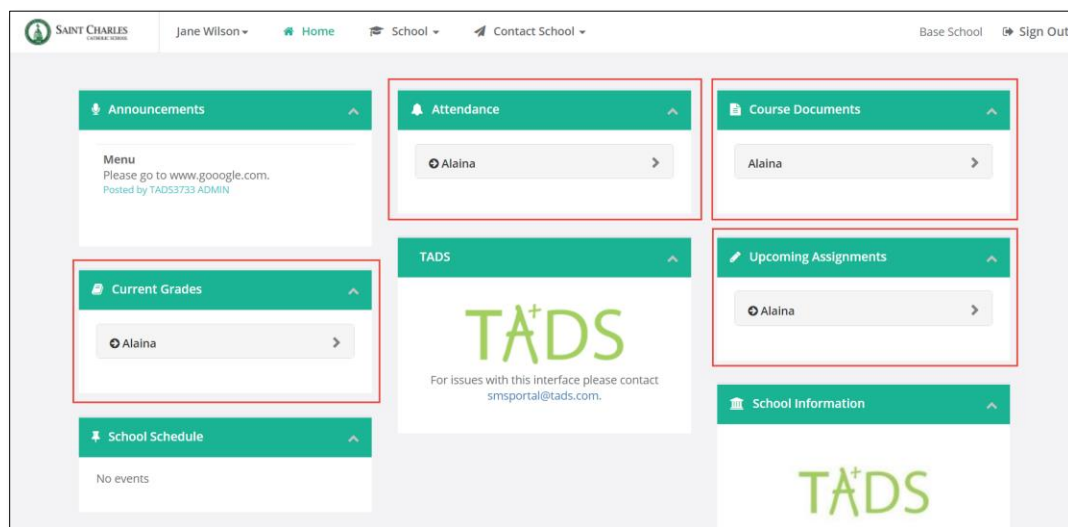

To customize your Dashboard:

1. To move a widget, click and drag it to the new position.

 **NOTE:** When you release your mouse, the other widgets will move to make room for the one you just moved.

## Viewing Student Information

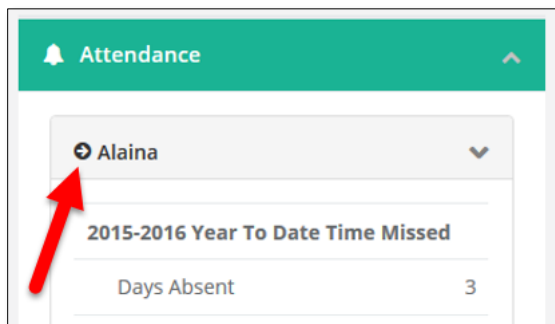

All student information is viewable from your home dashboard.

## Viewing Grades

You can view your student's current grades for their classes as well as (if applicable) the standards they are being graded from and their grades for each assignment. Information for each of these items will be displayed on a different page within your student's profile section.

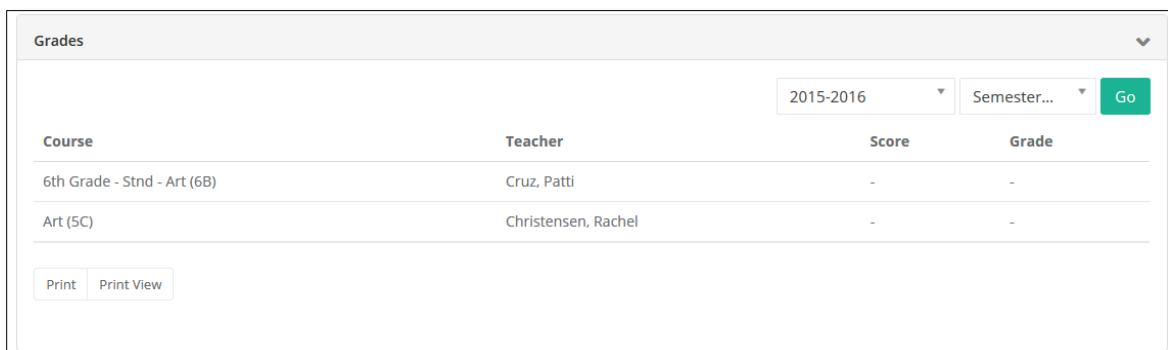

If you do not see these sections, your school may not send grade information through the Household portal. If you were able to see this information recently but do not currently, this may be because your school has updated their display options. Each school has a preference as to which grading and student information they display through the Household portal; they will generally inform you of how and when you can expect to see grades when this section is hidden.

To view currently calculated grades for your student's classes,
